

## Prodjuser SLANT 1612+ flightcase met 12 HE top en 9 HE front + flightcase 10 HE

Model: 089SLANT1612

Merk: Prodjuser

The Prodjuser Slant 1612+ is a dual/split version of the very popular Slant 1216 case – with some differences. The design is based on limited transport space (small rental and musicians etc.). The idea is simple: both cases will fit in a descent size station wagon and after taking them out, you just mount/lock them together and roll them in to the venue... Simple! It's higher priced then the regular 1216. But hey, you get 2 cases now!

### Differences towards a regular 1216:

1. Top rack offers 19inch/12U mixer rack space (12U = sliding)
2. Top rack offers 9U front rack space – punched (1216 = 6U)
3. Bottom case has 10U rack space (punched)
4. Professional Penn locks (2 pcs) to lock very firmly bottom and top case and thus create one stock
5. Both cases have 4 special feet (male/female) to insure even more fixation while rolling as a stack
6. Top and bottom case have a hinged door on the rear side with Penn butterfly lock

### Check out these PRO features:
