

NewHank Roommate

Model: 089NEWHANKROOMMATE

Merck: Newhank

The ROOMMATE by NewHank is a 4 Zone Stereo Matrix Mixer, meaning that any of the 6 stereo input channels can be freely distributed to any of the 4 stereo zone outputs. Connect and control up to 3 microphones and 11 Stereo line sources – like CD players, Radio's, Satellite- and Cable- receivers etc. – and distribute sound to a maximum of 4 different rooms. As a bonus the additional Dual USB connections enable a 2-channel stereo audio feed from a MAC or PC. The output section (Master, Zone 1-3) are controlled by recessed potmeters. But in some situations you do not have a screwdriver... We understand this. And therefor you can order the ROOMMATE also with "normal" volume potmeters on the output section – and this option is FOC (free of charge). *Check picture number 4.*

Key features

- 5 line control channels plus separate mike section
- 11 stereo line and 3 mike inputs
- 3 band equalizer per channel
- 2 USB input channels for playback audio from a computer
- 2 pair stereo balanced XLR outputs for Master and Zone 1
